## EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

### In the specification

In paragraph 1, line 3, "[Docket No. IDT-1673]" has been changed to "10/037,291".

The following is an examiner's statement of reasons for allowance: none of the available prior art of record teaches or fairly suggests a packet switching system comprising line cards with predicted available queue space tables and a cross point switch with buffers at each cross point containing actual available queue space tables, as recited in claim 1.

Petersen et al. disclose an asynchronous transfer mode switch comprising cross point units containing two buffers at each cross point and status registers which "are updated to have stored therein indications of whether buffers in the cross point units (XPU)s **32** on the row managed by the row column units (RCU) **40** are 'free' or 'occupied'" (column 8, line 14). Manning et al. disclose a joint flow control mechanism comprising a transmitting element and a receiving element with a buffer along with an update event which "provides the transmitting element **12** with a more accurate

indication of receiver element **14** buffer **28** availability for that connection **20**" (column 7, line 27).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
